EDUCATION

Guangzhou Maritime University   09/2022-07/2026
B. Eng. in Engineering Management, School of Future Transportation
Average Score: 82.99/100   Rank: Top 22% (32/145)

RESEARCH INTERESTS

Intelligent Transportation System, Mixed-Traffic Dynamics, Multi-agent Control, Dynamic Traffic Assignment, Transportation Network Optimization, Urban Computing, Spatiotemporal Data Analysis, Applied Mathematics

RESEARCH EXPERIENCES

Guangdong Provincial Special Fund for Science and Technology Innovation Strategy   07/2024-04/2026
Title: *Cooperative Game-Based Network Traffic Assignment Mechanisms for Enhancing Urban Transportation Efficiency | Grant No. PDJH2024A289 | Project Leader | Advisor: Dr. Lei Hu*

➢ Authored a systematic review on dynamic traffic assignment (DTA), synthesizing insights from 110+ studies on multi-class vehicle modeling, nonlinear equilibrium evolution, and solution algorithms.

➢ Developed a VI-based DTA model that unifies UE–SO equilibria into a tunable spectrum, by decoupling CAV penetration into automation levels (AL) and connectivity levels (CL) as evolution variables.

➢ Proposed the AMPAS algorithm for solving DUE, DSO, and UE–SO mixed equilibria within the AL–CL framework, achieving 27.2% faster convergence than gradient projection on medium-scale networks.

➢ Directed team task delegation, milestone tracking, and mentoring of lower year members; coordinate regular progress meetings to align efforts and ensure on-schedule research deliverables.

Guangdong Provincial College Student Innovation & Entrepreneur Training Program   11/2024-02/2026
Title: *Intelligent Recognition of Urban Traffic Equilibrium States under Air-Ground Collaborative Monitoring | Core Member (Second Rank) | Instructor: Prof. Xinhai Xia*

➢ Integrating heterogeneous data sources from roadside sensors, probe vehicles, and UAVs to construct high-dimensional traffic flow tensors, supporting accurate traffic equilibrium state recognition.

- Formulated three representative real-world data loss structures—element-wise, fiber-wise, and mixed—within urban traffic flow tensors, serving as a rigorous testbed for refining data recovery algorithms.
- Developed an adaptive truncated Schatten norm-based low-rank tensor completion model to effectively fill gaps in traffic datasets with complex missing patterns, improving MAPE by 10.6% and RMSE by 6.1%.
- Facilitated industry-academia partnership for traffic survey equipment and training, guided junior students in fieldwork to create datasets for analysing traffic flow dynamics and defining equilibrium states.

High-Quality Development Project for Hundred Counties, Thousand Towns, Myriad Villages   07/2024
Title: *Investigation on Traffic Safety and Planning in Kaiping City | Project Leader | Advisor: Dr. Lei Hu*
- Collaborated with the Municipal Transportation Department to analyse traffic accident and violation data, identifying accident hotspots and associated hazard types, and designing two targeted questionnaires.
- Led a seven-person team to conduct on-site surveys, interviews, inspections, and drone photography, collecting data on traffic flow, vehicle management, pedestrian movement, and infrastructure.
- Utilised SPSS and LLM tools for analysis of survey data and interview recordings, uncovering key issues and proposing actionable solutions that provided insights into the city's traffic safety and planning.
- Authored two papers: one analysing the traffic safety behaviour, attitude, and cognition relationship using Structural Equation Modeling; the other assessing the city's traffic governance through Grey Relational Analysis and Fuzzy Evaluation; synthesized report was adopted by the Municipal Transportation Bureau.

INTERNSHIP

Guangzhou Xueshujia Software Technology Co., Ltd.   **01/2025-05/2025**
Simulation Assistant Engineer | Mentor: Dr. Shen Wenchao
- Deployed a multi-agent reinforcement learning module for CAV control in the company's traffic simulator, enhancing its capability to model and visualise V2X-based highway shock-wave propagation.
- Benchmarked the simulator against leading platforms such as SUMO using identical real-world trajectory datasets, diagnosing fidelity gaps and recommending optimisations to enhance competitiveness.
- Surveyed major traffic-related competitions and conferences over the past five years, analysing emerging trends in the field and discovering potential opportunities for industry–academia collaboration.

EXTRACURRICULAR ACTIVITIES

Innovation and Entrepreneurship Incubation Park   **03/2024-03/2025**
AIGC Imaging and Media Entrepreneurial Project | Founder and Technical Lead
- Designed customized image generation workflows based on Stable Diffusion and Midjourney, providing AIGC solutions for industrial clients such as shipping logistics and sports apparel.
- Developed special-effect process for e-commerce model clothing replacement, product rendering, and cosplay photo effects, estimated to cut costs by ~20% and boost efficiency by ~30%.

Voluntary Teaching Programme at Maoming Rural Primary School   **07/2023**
- Designed and delivered interactive lessons for primary school students, while engaging with local communities to gather insights into rural revitalisation and industrial development.
- Wrote a community report and four promotional articles to publicise local industries and rural life, inspiring more students to participate in volunteer education initiatives.

AWARDS & HONOURS

- Best Poster (International), 25th COTA International Conference of Transportation Professionals   **2025**
- Meritorious Winner (International), Interdisciplinary Contest in Modeling (ICM), COMAP   **2025**
- Third Prize (Provincial), China Undergraduate Mathematical Contest in Modeling   **2024**
- Third Prize (Provincial) 18th "Challenge Cup" National Students' Academic Works Competition   **2024**
- Second Prize (School), 19th National Competition of Transport Science and Technology   **2024**
- Science and Technology Innovation Model Scholarship, Guangzhou Maritime University   **2024**
- Third-Class Merit Scholarship, Guangzhou Maritime University   **2023**
- Bronze Award (Provincial), FLTRP · ETIC Cup English Writing Contest   **2023**

SKILLS & LANGUAGES

Technical Tools: Python, MATLAB, SUMO, LaTeX, Git, SPSS, Photoshop, Illustrator
Languages: English (fluent), Mandarin (native), Cantonese (native)
